M-210

Rutile Titanium Dioxide

M-210

CHLORIDE PROCESS | MASTERBATCH GRADE

M-210 is a rutile titanium dioxide pigment produced by the chloride process and specially treated with inorganic and organic compounds. It provides high hiding power, excellent dispersibility, good dry powder fluidity and easy processing properties, making it especially suitable for polyolefin masterbatch production.

Applications

- Polyolefin masterbatch
- Engineering plastics such as PE, PP and ABS
- PS and its co-polymers, rubber

Key Features

- Bluish undertone
- High hiding power and high tinting strength
- Easy dispersion in many polymers
- Excellent processing property

Specification	Typical Value
TiO ₂ content, %	96.5
Surface treatment	Alumina, organic compounds
Identification	ISO 591: R2; ASTM D 476-84: II(IV)
Rutile content, %	99.9
L*	98.2
b*	1.80
Specific gravity, g/cm ³	4.1
Tinting strength, %	120
pH	7.2
Oil absorption, g/100g	14.5
Volatile (during packing), %	0.2
Carbon black undertone (CBU)	15

Storage & Packaging

Storage Conditions	Store in a cool, dry and well-ventilated place. Protect the product from moisture, direct sunlight and extreme temperatures.
Packaging Options	25 kg bags; 500 kg/bag FIBC (jumbo bag); 1000 kg/bag FIBC (jumbo bag).
Container Loading	25 kg/bag: 1.2 MT per pallet, 24 MT loaded in one 20GP container. 500 kg/bag or 1000 kg/bag FIBC: 20 MT with pallets loaded in one 20GP container.

Safety Notice

Use good industrial hygiene practice. Avoid dust generation. Please refer to the Safety Data Sheet for more handling information.

The data included in the typical properties is not a specification. The information in this data sheet is a general guide to the properties of the product described in it. Nothing in this data sheet is to be construed as a warranty, express or otherwise. In all cases, it is the responsibility of the user to determine the applicability of the information and recommendations and the suitability of the products described for its own particular purpose.
