

M-108

Sulfate Process

M-108 is an alumina treated rutile titanium dioxide pigment made by the sulfate process. It is specially designed for masterbatch and compounding applications. It disperses easily in polyolefins with minimal effect on melt flow index and is recommended for plastics applications requiring high thermal stability.

Applications

- Masterbatch & compounds
- Polyolefin & PVC film
- Plastics requiring high thermal stability

Key Features

- High heat stability
- High opacity and whiteness
- Low moisture absorption
- Low oil absorption
- Low reactivity with antioxidants
- Excellent compatibility with plastic resins
- Rapid and complete dispersion
